Not your average Night & Day Cream

Healing Herbs Night and Day Cream is a moisturizing healing product for the skin. My herbal creams are gentle to sensitive skin and effective for all skin types. Effectiveness is achieved through the superior penetrating qualities of the natural oils that provide a consistency closest to that of the skin's own sebum. The "Night & Day" cream formula is 100% natural and free of perfume oil. The pleasant fragrance of the herbs and oils offer a natural relaxing aromatherapy. Apply a light layer to face and hands at night and use again during the day, especially after bathing and prior to makeup application. Healing Herb creams aid in collagen production and greatly reduce overnight puffiness. Daily use evens the overall skin tone and reduces age spots as well as redness in the skin.

The key to the use of Healing Herbs Night & Day cream in the treatment of Rosacea and Eczema is uninterrupted use 2-3 times per day for effective results. A carefully chosen combination of herbs is used for their time tested superiority and effectiveness. Three of the herbs have the ability to speed the healing of the upper dermal layers through healthy skin cell proliferation and tissue regeneration. Other herbs chosen for the formula are proven topical pain killers. Relief from itching and irritation of the affected area allow my salves and creams to work faster and leaves very little reminder of the problem throughout the day. And finally, essential oils that offer antihistamine, anti-inflammatory, antibiotic and antioxidant constituents occur naturally in the herbs, making my product a cleansing, soothing and softening cream that is well rounded and useful in many applications.
